

A very small collaborator.

Real hamster. Curious moments. Kind care.

Potato is a dwarf hamster in Poland. His family shares short videos and practical, sourced care guides in English. Adult humans manage the website, enquiries and commercial arrangements.

What we can make together

Natural product demonstrations

Short, original clips of suitable hamster products used in a real home. Product suitability is checked before filming.

Helpful care content

A practical article or printable resource for adult carers, with sources and a clear connection to the product or partner.

Creator swaps and Potato Cam

A small joint video or care Q&A.; Potato Cam is coming soon; any stream collaboration depends on platform eligibility and a confirmed date.

How we work

No waking or frightening Potato for a shot. No staged danger. Gifts and paid partnerships are disclosed. Our opinions stay honest. We agree deliverables, fees, approval scope and usage rights before work begins.

Early-stage channel. Scope and audience figures are confirmed for each proposal; no guaranteed reach or results.
